

Identity Kit

Type, palette, logo/favicon, style note — one page, decided once

Type

One font: **Inter** (heading and body are the same family, two weights only — 500 for body text, 600–700 for headings and labels). No second display face.

Palette

Role	Hex	Swatch
Background (near-black)	#14171C	
Text (near-white)	#EDEBE4	
Accent (single)	#C98A3E	

3 colors total, one accent, no exceptions — no semantic colors added for status/state.

Logo / favicon

A checkmark mark, amber on near-black — name set in the heading font (Inter, 600) beside it. No illustration, no abstract mark unrelated to the claim.

Style note

Fonts: Inter only (500 body, 600–700 headings). Colors: background #14171C, text #EDEBE4, single accent #C98A3E.

Mood: a security audit log, not a portfolio brochure — calm, flat, evidence-first.

Added to the Claude Project's custom instructions as a standing style rule, so every future section is built against the same two lines instead of being re-decided each time.
