

# Live Contact Form — Real Test Submission Proof

cevdetsatar-ml-portfolio.netlify.app — end-to-end test, real submission reached the dashboard

## 1. Submitted on the live site — Netlify's confirmation page

After filling in the form on the live, deployed site and clicking “Send message,” the browser was redirected to Netlify's default success page, confirming the POST request was received:

## 2. The submission, verified in the Netlify dashboard

The same submission appears under “Verified submissions” in the site's Forms dashboard, with the real name, email, and message fields intact — confirming the data actually reached the backend, not just that the page redirected:
